DEMONS DON'T JUST BREAK THE RULES.

They dismember them.

Underdog is an understatement when you're up against some of the most diabolical, back-stabbing creeps to ever slime their way into a fighting tournament. So keep your wits about you or you'll end up losing your head.

PLAYSMART

To help you make the right purchasing choices, here's a complete list of Mature-rated games in this issue of Code Vault*:*

Full Spectrum Warrior

By THQ • Xbox

Warfare is about being shot at and shooting back with real bullets. Deathly animations, bloody wounds, and the main objective of wiping out a dangerous band of militia using lots of firepower is only for the mature minded. Full Spectrum Warrior features strong language, which is mandatory in this type of game, too.

Grand Theft Auto Double Pack

By Rockstar Games • PS2, Xbox

Two games in one package means twice the violent, adult, and controversial content. GTA III and GTA: Vice City are the current lightning rods for what should and should not be explored in games, so expect the most intense stuff you can imagine: violent crime (as performed by the player), prostitutes, lots of weaponry, carjacking, fighting and killing policemen, and many more dirty deeds done dirt cheap.

Hitman 2: Silent Assassin

By Eidos Interactive • PS2, Xbox

As the name suggests, you play an assassin, and the levels involve stalking your prey with the final goal of killing them. So the violence is an intrinsic focus of the game, and it's accompanied by the usual blood and gore. Hitman 2 is definitely not suitable for younger gamers.

Siren

By Sony • PS2

Siren is a Mature-rated horror game complete with requisite deaths by shooting, stabbing, and bludgeoning. The ability to see events unfold through the eyes of sobbing, cackling, howling corpses could be Siren's creepiest feature.

The Suffering

By Midway • PS2, Xbox

The Suffering is horribly sick, violent, nasty, and cruel. Everything in it quickly becomes soaked in blood, you can target (and explode) specific body parts, and the creature designs are downright disturbing. The language is particularly filthy—definitely not for virgin ears.

Thief: Deadly Shadows

By Eidos Interactive • Xbox

Thief: Deadly Shadows is a game about taking people's stuff—by force if necessary. When it comes to violence, Thief is more about the intent than the end result; no one explodes forth with entrails, but the deliberation required to do harm to anyone may disturb some. Still, the violence isn't gratuitous at all, and every action has appropriate consequences.

Get the R-35 Skyline

First, you have to get a very fast car like the Speed King's car. Then, set the gear ratios to go to 250 mph (402 kph) and speed through the highway until you find a truck with a car strapped on its back. Accelerate to 250 mph and ram the truck hard flush on the rear. This would usually knock the car off it, but instead, a little message should pop up by your speed gauge saying, "Cheat Activated." Now go to the Car Shop and select Class A. The R-35 should be there.

Pink Cadillac

In Level 6, go to the squidport. Climb onto the building next to the Planet Hype sign (the one with the aerials on top). Walk up the slope until you are on the flat part of the roof, turn the camera to face the other side of the building, and then walk along the roof both ways. It should crash into the side. Drop onto it and **press Y**. Presto—you've got yourself a Cadillac.

Different Styles: Raise Mega Man EXE to Level 2 to unlock his Ground Style and raise him to Level 3 to unlock his Bug Style.

Unlock Mega Man EXE: Beat Story mode on any difficulty with Sanosuke on any setting and a cinema of Mega Man EXE will show. Start a Vs. game, beat your opponent, and then Mega Man EXE will challenge you. Beat him to unlock him.

Unlock Mega Man Zero: Beat Story mode on the normal setting with Mega Man EXE and get the red Z-panel. Then, beat the Shadow Realm up to Level 5 to get the green Z-panel and then beat Shadow Realm 2 up to Level 10 to get the blue Z-Panel. After you beat the game, a cinema of Zero will appear. Start a Vs. game with Mega Man EXE and beat your opponent, and Mega Man Zero will challenge you. Beat Mega Man Zero to unlock him.

To get to the Shadow Realm, play the Story mode on no higher than normal difficulty and do not use any continues. The thing that asks you to trade will say you are a good fighter and allow you to go to the Shadow Realm, but if you lose in the Shadow Realm, you do not get anything and you can never go back, so it is advised to save before going to it. The same is said about Shadow Realm 2. If you choose not to go to the Realm, it will ask you again if you play through Story mode again without using continues.

Jump 600 Feet in the Everglades

From your starting point on the dock, back up slightly and look to your left. Ride over to the set of jumps that are at the other end of the barges. Once in the area, ride over the jumps to your left until you reach the jump that is directly left of a palm tree. Past this jump are two landing slopes: one that is directly in front of the jump next to the palm tree and one that is behind it and to the left. Ride over to the second slope and face the right-hand corner/side area of it. Continuously ride into this area, trying to push your way through it. With some speed and the proper placement, you should be able to ride through the corner of the slope and "fall" through the ground, eventually respawning back onto the dock where you started. During this "fall," you will also be able to string together as many tricks as you wish for an insanely huge multiplier without the fear of crashing; when you respawn back onto the dock, the game still acts as if you are in the air!

Be careful with the gas and brake/reverse as the game also acts as though you are on the ground as well. When you are done with your multiplier, speed off into the level as usual. If done correctly, when your jump-distance meter appears, it should read more than 600 feet. Repeated use of this glitch to increase your multipliers may cause the game to crash. Be sure to save your place immediately after you have achieved your new distance. As with any glitch, use it at your own risk.

Ninja Gaiden

Hints

Defeating the Dragon Boss: Try to level up your Lightning Ninpo to the maximum. Constantly run left or right. When he flaps his wings, you will take a little block damage. The only way to hit him without getting in the lava is to hit his head when he lays it down momentarily. Try using the Flying Air Dash attack. He will try to grab you immediately afterward; throw in a Ninpo just after that attack. If you need to, use a Great Devil Elixer to defeat the Dragon boss.

Easy Essence: Killing a foe without using Y will give you five times more Essence. Also, in Chapters 6 and 7, you will encounter the Skeleton Dino boss. After you defeat him, climb down toward the new opening he made in the floor but stop at the save location. Turn around with your Nunchaku and jump up to the bats. Once you reach them, kill no more than four bats and charge your super attack, taking in two Essence Orbs. Then, unleash the attack and gather up to 2000 Essence each time. To replenish the bats, jump back to the save point and repeat. The bats do not hurt you enough to kill you and will randomly give you health. The maximum amount of Essence that can be held is 99,999.

An Extra Life of the Thousand Gods: In Chapter 15, after you find the key to the core outside of the gate, go down the stairs and through the big door. Once inside, proceed toward the area where you found the chest with the Essences and fought the black spider ninjas. There is a portal there that takes you to the Fiend Realm. Once you beat the fiends, a chest will appear; the life of a thousand gods is inside of it.

Prince of Persia: The Sands of Time

Unlock Original Prince of Persia

Start from the Above the Baths save file, after you acquire the new sword. Go down the stairwell that leads to a large cavernous area, and after going through the area, you'll be in a small room with Farah. Turn the lever in the center of the room clockwise until it clicks twice—a secret door that you cannot see will then open. Go to the wall at the opposite side of the entrance and swing until you find a spot on the wall where your sword doesn't spark. Strike this area a few times to reveal a hidden room. Enter the room to unlock the original Prince of Persia game, which is now available at the main menu.

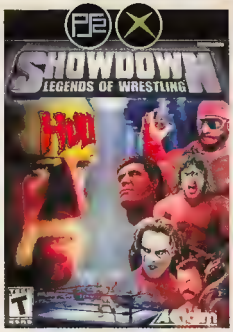
Showdown: Legends of Wrestling

They're back! Here's the lowdown from the makers of Showdown: Legends of Wrestling on how to become a champion.



Momentum

By Jim Richardson (designer)

A solid grasp of the concept of momentum and how it functions in Showdown: Legends of Wrestling can be very helpful in your quest for wrestling domination. The Momentum meter is the smaller bar located beneath the health bar. Momentum represents how much of a "roll" your wrestler is on and his level of crowd response. You have to build it all the way up in order to pull off your wrestler's Finisher. Basically, think of the momentum as a tug of war between you and your opponent. You build it up by doing two or more moves or taunts in a row. Letting your opponent do the same to you will decrease your momentum and increase his.

We tried several different ways of implementing momentum while making the game. The first one we tried had no real connection between your momentum and that of your opponent; it gave you momentum for every move you successfully pulled off. Your opponent could not take away your momentum, and it was possible to build it up really fast. This system was fun, in a way, because you got to see a lot of Finishers, but at the same time, it just didn't feel right. When you watch a real wrestling match, you don't usually see the guys doing their signature moves too early or often. Seeing them that often kind of took away from the coolness of the Finishers and the feeling of accomplishment involved in pulling them off. So, back to the drawing board....

The next method we tried gave you momentum for every move you did and let your opponent take momentum away from you for every move he did. This proved to be a bit too much of a tug of war, and the end result was that Finishers were almost never seen because one hit would knock down your meter.

Seems like the third time was the charm; as soon as we implemented the current system and played a couple of matches, we knew this was the one. There was still a good deal of back and forth between players; you had to do some work to get your Finisher, but it wasn't too hard or too easy, so we went with it—hope you like it!

Classic Matches

By Jim Richardson

No one who witnessed it will ever forget that night in the spring of 1987 when Hulk Hogan did the unthinkable—body slamming the 500-pound Andre the Giant to the mat in the Pontiac Silverdome in front of 93,000 screaming wrestling fans. The Hulkster followed up this impossible feat with his trademark off-the-ropes leg drop and then pinned Andre to retain the title and cement his place in wrestling history. Professional wrestling has a long and storied history of amazing victories snatched from the jaws of defeat, fantastic feuds, and bitter rivalries. With Classic Match mode in Showdown: Legends of Wrestling, we wanted re-create some of the greatest moments and matches ever and give users a chance (in some cases) to rewrite history.

The Classic Matches were designed to be challenging—in some cases, extremely so. As the player, you enter the match at a pivotal point in the action and usually (but not always) in some kind of rather bad situation. It's up to you to do what is necessary to get the win. This is easier said than done, but there *are* some strategies and insights that can help you in your quest for victory.

There are no secret cheats or easy techniques to get you through the Classic Match mode. You'll have to enter each match already underway and defeat one of the greatest wrestlers ever. There's nothing I can tell you here that will win the match for you if you wrestle poorly or haphazardly. You will have to learn to wrestle smart and carefully if you want to beat all of the Classic Matches. Understanding the conditions under which you begin each Classic Match is vital to helping you come up with a strategy to turn the tide of the match, take charge, and ultimately win. In some of the Classic Matches, you actually start off with some advantages, but you can easily fall behind and lose if you aren't careful.

In many of the Classic Matches, you'll start off stunned, in a hold, or in a pin; the first priority

is recovery and/or escape so you can start your attack. With this in mind, it's a good idea to be ready to rapidly pound the □ (PS2) or **X** (Xbox) button as soon as you enter the match. Failure to do this allows your opponent extra time to inflict more damage on you and possibly even win the match.

It's extremely important that you check out both your Health and Momentum meters and those of your opponent. They are probably the very best indicators of how you need to approach the match. If your health is about the same as (or better than) that of your opponent, it's time to take it to them and go on the offensive. Hit them hard and fast with everything you've got, but don't forget to keep an eye on your health—if they start doing some serious damage, you'd better switch gears before it's too late because the match can be over before you know it.

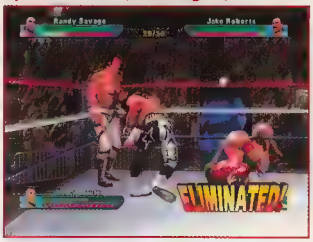
If you start the match at an extreme disadvantage or with very low health, a more defensive approach is in order. You'll need to focus more on countering their attacks, landing what you can safely, and staying out of harm's way.

You want to keep an eye on your Momentum meter as well—filling it will allow you to pull off your Finisher, which in some cases will be enough to put the match away (provided you follow it up with a pin). Performing two or more moves in a row or performing taunts will help fill the Momentum meter and sway the outcome your way. Gaining momentum for yourself will also help you out in another way—it will take momentum from your foe and prevent him from pulling off his Finisher on you. If you let your opponent start pulling off big moves, you are going to be in a world of hurt.

It can help to do a little research by familiarizing yourself with the Wrestler you'll use. The best place to do this is in other areas of Match Play. Knowing the moves a wrestler can do will give you some insight as to his wrestling style and maybe an extra edge.

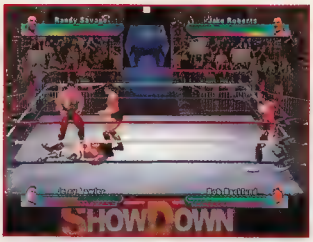
Winning the Battle Royal

By Justin Withers (lead designer)



One of my favorite modes of gameplay is Battle Royal. The designers and I wanted to make Battle Royal a difficult mode that forces players to use strategy, not just stand toe to toe and beat each other up.

There are a lot of strategies when it comes to winning a Battle Royal, but first, I'll discuss the ways the mode works depending on the number of people playing. When in a single-user Battle, there are no second chances. Once you're eliminated, the match is over. In all other matches (multiuser), when users are eliminated, they take control of the next wrestler to come out from backstage.



Battle Royal begins with a pool of 30 wrestlers, four of whom begin the match in the ring. After a wrestler is eliminated, another runs out from backstage and takes his place until there are only two remaining wrestlers. Matches tend to run anywhere from 20 to 45 minutes, so be ready for some extended match lengths.

To win the Battle Royal, you have to be the last man standing after successfully throwing all other wrestlers over the top rope and knocking them down to the floor below. This is not an easy task, but the A.I. will also be eliminating opponents. Take advantage of this by letting it do some of the work. Don't try to eliminate every single opponent yourself. You can get into some serious trouble by constantly seeking out an opponent. If your health drops below about 75 percent, sometimes it's best to just stand back, let your health regenerate, and keep an eye on which opponent is ready to be eliminated next. Once an opponent's health is below a certain point, he can be eliminated. Keep an eye on the action to get an idea of when opponents can be knocked off of the apron. Once they're over the ropes, quickly punch or kick them to the floor.

Another roadblock to winning the Battle Royal is the amount of chaos in the ring with four wrestlers. Staying out of the mob is a tactic that will pay off. Once surrounded by the other wrestlers, the chances of taking damage are at an all-time high. By paying attention and staying out of danger, you'll minimize the risk of taking damage and maximize your chances of staying in the match.

Battle Royal takes more time than any other match in Showdown, sometimes going longer than 20 minutes. To win it by being the last man standing, you have to play smart. Hopefully, some of these tips and information will help you formulate your own game plan. Keep your health high, let the A.I. do some of the work, and always be ready to grab a distracted opponent and throw him out if you want to be successful in Battle Royal.

How To Win Cage and Table Matches

By Wes Stubblefield (designer)

Showdown: Legends of Wrestling offers two unique versions of old standard match types: the Cage match and the Table match. There are several ways to win either match, but for now we will focus on only the most successful methods to victory. We wanted realism in the Cage and Table match lengths, and that meant giving

users the freedom to go for victory right away (but with the A.I. making that very difficult) and finding a way to make the A.I. wrestle a more realistic match and *not* go for victory right away. We feel strongly that Showdown's Cage and Table matches are the best simulations of these matches in any wrestling game..

First, we'll start with the Cage match. A Cage match can be won by going over the top of the cage or by slipping through the door after the referee has opened it. The best strategy to achieve either goal is to beat your opponent mercilessly until he's unable to stop your attempt at escape. To do this, it is best to alternate your attacks between strikes, grapples, and ready attacks. First, start striking your opponent multiple times and with varying degrees of intensity. I find it best to start with strong strikes and work in a quick weak strike to keep him off balance. Work to get a quick stun on your opponent, then set him up for a powerful grapple attack or a couple of quick ready attacks. Keep working this same pattern until you've worn your opponent down enough so you can try to escape from the cage.

Once your opponent has been sufficiently stunned, head for the cage door rather than climbing up the cage. By going through the door, you will give yourself quite a bit more time when trying to attempt an escape. When you are near the cage door, call for the referee to open the door and move to get out of the ring. A stun meter will come up, and you will need to wind the meter to zero by mashing the appropriate buttons. Once you've gotten the meter all the way to zero, you can climb out of the door and down to the floor, winning the match! That is, of course, unless the opponent has pulled you back into the cage. If that's the case, you'll need to start over to escape the confines of the unforgiving steel cage.

Next, we'll look at how to quickly win a Table match. This one is easy because you do not need to beat on your opponent until he's a bloody mess, and it doesn't take very long to complete. First, use the same technique mentioned above to get your opponent stunned quickly. Now, while he's stunned, move to the outside of the ring and pick up the table. Push the table into the ring and set it up in the nearest corner. Return to the ring and attack the still-stunned wrestler. If the other wrestler has become unstunned then try to stun him once more using a combination of strong strikes and ready attacks. Now, once you have him stunned again, use the appropriate grapple to lock up. From there, Irish whip the wrestler in the direction of the set-up table. If you did it correctly, the wrestler will be on top of the table! The Irish whip should increase the length of the stun and allow you to climb to the top rope for a splash onto the wrestler; the table will break, and you'll win the match.

Wrestling Styles

By Wes Stubblefield

Showdown: Legends of Wrestling features more than 70 wrestlers, and because of this massive roster, we had to tailor each wrestlers' known attributes and abilities to their wrestling style.

The design team watched hours and hours of reference footage on each and every wrestler. We copied down moves they performed in the ring and made notations on moves they could have done during their wrestling days based upon their strength and ability. From there, we took into account how a wrestler's style of work might have changed over the years. For instance, Terry Funk was a very traditional wrestler during the early part of his career with a big emphasis on mat wrestling and a more submission-based move set. However, in later years, he completely revamped his own style to include a hardcore aspect and even incorporated a few high-flying aerial maneuvers, such as a moonsault. Once we had that down, we divided the roster into five distinct groups:

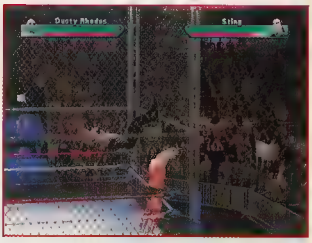
Brawler: uses power and strikes to beat down an opponent

High Flyer: a wrestler more likely to perform moves from the turnbuckle

Technical: uses reversals, submissions, and technical moves to achieve victory

Traditional: more mat-based style with little to no aerial maneuvers

Hardcore: will do (and use) anything to win



After we'd classified each wrestler into one of the above categories, we started to work on their individual move sets by giving them moves they actually performed in the ring. Next, we assigned each wrestler's Finisher based upon their history in the squared circle. This was then followed by moves they could've done during their career. For instance, larger, more powerful wrestlers like Andre the Giant were given power-based attacks like body slams and atomic drops to help them win matches. This is in contrast to wrestlers like Jimmy "Superfly" Snuka or the Dynamite Kid, who were more likely to try an aerial maneuver off the top rope to score a victory. One of the most difficult tasks of creating a wrestling game is finding a move-set template that can work for 73 distinct personalities. Some wrestlers did only a handful of moves, while others had dozens.

Once each of the nearly 90 moves were set, we tested each wrestler to make sure each of their move sets was as accurate as possible. We made adjustments as necessary and even removed some moves completely if they were really out of character for the wrestler. Finally, after making 1001 changes, we felt like we were as close as we were ever going to be and were comfortable with the accuracy of each wrestler's move set and style.

Controls

By Mike Huey (designer)

After Acclaim moved the development of the Legends franchise to the Austin studio, none of the designers here had worked on the previous wrestling games. Our focus as the new design team was to create a new gameplay system in Showdown that would be as friendly as possible while still retaining a level of depth that would appeal to a serious player. We wanted to make "pick up and play" the underlying theme of the new system to avoid the confusion that plagued previous games in the series. To do this, we scoured the Internet for reviews from gamers and syndicated reviewers alike to get a firm idea of the likes and dislikes of the old ISP system. Additionally, we spent a great deal of time picking apart the controls of our competitors' games. Armed with this knowledge, we set about rebuilding the controls from scratch. This process was by no means an easy one. Actually, it was quite painful because there are always tradeoffs that require you to nix an element that everyone likes in order for the system to work as a whole. Nevertheless, in the end, we are confident that we achieved our goal of user friendliness and gameplay depth. Showdown is much easier to play than the past efforts. Players can now easily memorize the controls and execute complex moves without watching timing meters or needing to press a gazillion buttons to do so. The end result is an interface that removes the frustration factor and allows gamers of every level to focus on enjoying the game. Here are a few tips to help you become more familiar with the controls of the game as well as add combo modifiers.

Running Attacks

Each wrestler has three Running attacks they can use against a standing opponent. These attacks are performed by first pressing the Run button (PS2: R1) (Xbox: right trigger) to begin running toward your opponent. When you get near him, press either the Ready attack button (PS2: △) (Xbox: **Y**), the Grapple button (PS2: ○) (Xbox: **B**), or the Strike button (PS2: ×) (Xbox: **A**) to launch your attack. Timing is critical for successfully executing a Running attack. You want to wait until you are at medium distance, about four steps away from your opponent, before pressing the desired attack button. Running attacks can also be performed on an opponent who is lying on the mat or stunned in the turnbuckle. The method for performing them is exactly the same as if he were standing.

Countering a Running attack is possible by pressing either the Grapple or Strike button right after an opponent who is running toward you initiates a Running attack. If you are successful, your wrestler will respond with an attack that stops your opponent in his tracks. Be warned though: This type of counter is difficult to do and requires nearly perfect timing to pull off. Sometimes it's best to just evade the oncoming wrestler rather than try to damage him.

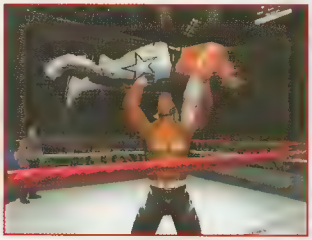
Ready Attacks

Ready attacks always come from the ready state. They are initiated by first pressing a direction on the left analog stick, followed by the Ready attack button (PS2: △) (Xbox: **Y**). The type of Ready attack your wrestler uses depends upon which direction you press the left analog stick and the state that your opponent is in. There are four states for the standing position. They are: Front, Behind, Bent Over Front, Bent Over Behind. There are three Ground Ready attacks that can be done to a downed opponent. First, move your wrestler to either his head or his feet, and then initiate your attack by pressing the Ready attack button by itself for the first attack, left/right on the left analog stick plus the Ready attack button, or up/down on the left analog stick followed by the Ready attack button.

Some Ready attacks can inflict additional damage by applying a combo modifier to them. A modifier is either an additional attack or a pin ending. For example, the fireman's carry can end with a spinal tap if the user applies a combo modifier to the move. To execute a combo, input the base Ready attack move and immediately press either the Ready attack button for an attack combo or the Strike button for a pin combo. Experiment with each wrestler to find which of his moves have combo modifiers built into them.

Ready attacks can be countered, resulting in a damaging reversal for your opponent. To pull off a counter, you must quickly press the Block button (PS2: ×) (Xbox: **X**) as your opponent begins his attack. Use counters wisely, though; your opponent can counter your counter by quickly pressing his Block button as you begin your move

Tie-Up Throws



Get near your opponent and press the Grapple button (PS2: ○) (Xbox: **B**) to get him into a Tie-Up. Once in a Tie-Up, you can walk your opponent around the ring for a short period. This enables you to place him where you want before performing your move. It's great for getting an opponent near the ropes to toss him out of the ring. Tie-Up throws become available when you have your opponent in a Tie-Up. When you're in this state, move the directional pad Up, Down, Left, or Right and quickly press the Grapple button (PS2: ○) (Xbox: **B**) or the Strike button (PS2: □) (Xbox: **A**) to perform a move. Tie-Up throws can have combo modifiers built into them just like Ready attacks do. They are executed in the same way as Ready attacks.

If you want to change the direction your opponent is facing when you have him in a Tie-Up, press the Action/Movement button before inputting your move. You can also pick up a wrestler who is down on the mat by pressing the Block button (PS2: ×) (Xbox: **X**) to stand. When you've got him standing, hit the Grapple button (PS2: ○) (Xbox: **B**) to get him into a Tie-Up and choose the move you want. Another thing to remember is that Tie-Up throw counters work exactly the same as those used for Ready attacks; just press the Block button right as your opponent makes his move. Remember that your opponent can reverse your counter.

Lastly, there are three Ground Tie-Up attacks that can be done when your opponent is lying on the mat. First, move your wrestler to either your opponent's head or feet, and then initiate your attack by pressing the Grapple button (PS2: ○) (Xbox: **B**) by itself for the first attack, left/right on the left analog stick plus the Grapple button, or up/down on the left analog stick followed by the Grapple button. Which gadgets make your games better—and which ones don't?

Logitech Cordless Precision Controller

Xbox

Rating: 5.0

Logitech Cordless Action Controller

PlayStation 2

Rating: 5.0

If you've been looking at those wireless Logitech controllers in the store and saying, "Too big, too much money, too bad," here's good news: The company has redesigned both its Xbox and PlayStation 2 controllers to be more comfortable, more energy efficient, and most importantly, cheaper.

The Cordless Action is darn close to the same size as Sony's Dual Shock 2 with the benefits of a more rounded feel, a full disc for its digital directional pad, and yes, no wires (2.4 GHz technology keeps things clean and reliable). Ergonomically, the controller is nowhere near as wide as the earlier model, and it's one of the most comfortable, natural-feeling PS2 controllers you could hope to hold.

The Cordless Precision, meanwhile, looks and feels like a Controller S in all the ways that matter; again, it's far less wide than its forebear. The cavity for the white and black buttons is recessed, but the buttons themselves are tall—easy to reach, but not in the way, and hard to hit accidentally.

Both controllers use two AA batteries (included—and they're Duracells) instead of four, which reduces the weight and bulk significantly. Due to some new power management technology, those batteries should last a good 30 hours before expiring, button response is excellent, and the rubber-coated analog sticks feel quite comfortable. Nifty translucent details on both units give them a little color and class.

The quality and performance of both the Cordless Action and the Cordless Precision is excellent. For the money—a very reasonable $40 each, as opposed to their earlier revisions' $59 and $69 price tags—you won't find better wireless controllers.—*Dan Elektro*

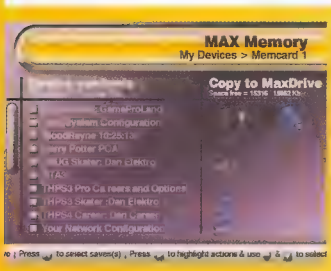
Datel MaxDrive

PlayStation 2

Rating: 5.0

Remember the DexDrive—the funky save-game transfer device that let you swap PlayStation game data with friends as file attachments and back up all your game save files to your PC? The concept is now reborn for the PS2, only it's even easier: Now, the transfer device is one of those USB memory sticks, and it could be the coolest peripheral to come out all year.

Simply shove the silver-and-translucent-blue MaxDrive into the front of your PS2, run the enclosed PS2 CD-ROM, copy files from your memory card to the MaxDrive, and *ta da*—your saves are safe. Unplug the MaxDrive, stick it into the USB slot on your PC (or Macintosh—something the DexDrive never supported), and copy your saves to your hard drive for permanent archiving—or attach the save files to e-mails and send them to other MaxDrive-equipped friends around the country. In the era of games that let you customize everything, create your own levels, and put your own face on characters, the MaxDrive's ability to let gamers swap personalized save games quickly and easily kicks ass.



Amazingly, the functionality doesn't end there. The MaxDrive makes it insanely easy to download new characters, levels, saves, and even EyeToy movies either over your PC's Internet connection (with the included PC program) or straight from your PS2's Network Adaptor. That's right—if you're already online with your PS2, now you can pull down goodies like user-created skate parks or custom sports teams directly to your MaxDrive courtesy of Datel's own servers. The software can also "crush" and "uncrush" save files to make online transfer quicker.

The MaxDrive is also available for the Xbox (with a green shell, natch); we didn't get a chance to try it, but the functionality should be the same. Buy a MaxDrive for yourself and then one for every PS2 gamer you know—this thing's awesome.—*Dan Elektro*

PROSTRATEGY GUIDE

Madden NFL 2005

Here's how to turn a Madden loser into a Madden winner. Use the plays scripted in this ProStrategy Guide, and you'll be able to strike fear into the hearts of any so-called powerhouse team...even with the Arizona Cardinals. By Atomic Dawg

Cardinal Rules

From Worst to First

Pity the poor Cardinals. Not only is Arizona's NFL representative a designated doormat in the real NFL, it's the lowest-rated team in Madden NFL 2005. Of course, the Cards aren't sitting alone at the butt-end of the Madden food chain. If you study the playbook of your favorite bottom-feeder, you'll find plays duplicating or similar to those below.

Identify Your Playmakers

The Cardinals have a decent roster with Josh McCown and Shaun King at quarterback, Marcel Shipp at halfback, and Anquan Boldin and Larry Fitzgerald at wide receiver all showing good Madden stats. Even backups like King and Emmitt Smith are above average. Study the stats in the Depth Chart screen on the Coach's Strategy menu to determine who will make your big plays.

Big Red Defense

Play the 3-4

3-4 Normal/LB Contain: The Madden Cardinals play well in the 3-4 Normal defense. The LB Contain is a good general-purpose base defense. It has four defenders playing zone pass coverage deep, and two linebackers covering the flat. Play as the left inside linebacker, who has zone pass coverage inside.

Blitz with the 3-4

3-4 Normal/LB Trio Sky Zone: If you want to run a quick playbook blitz, the Trio Sky Zone is a good call. If you're feeling daring, use the linebacker adjustments controls to send all the linebackers in on a blitz. There will be more rushers than there are blockers. It's a gamble, but it can pay off with a big stop, too.

Man-to-Man

3-4 Normal/2 Man Under: From the 3-4 defense, this man-to-man pass defense is best against four wide receivers or if you suspect the other team is going to pass for short yardage. Basically eight defenders are covering the pass with four of them playing man and four in a zone. If you are quick enough to use the individual matchup controls to double-team the wide receivers, you can put a serious clamp on any passing attack.

3-4 Blitz

3-4 Normal/Engage Eight: When you want to put massive pressure on quarterback, call this all-out blitz that sends eight rushers. Because the four linebackers are in 3-4 formation and playing off the line, they have a good opportunity to find paths to the quarterback. If a running back goes into motion, you can control one linebacker and move him over to cover while the others blitz.

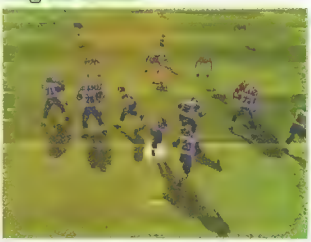
Playing the Middle

As middle linebacker, you'll see a lot of short passes. In a passing situation, hold the Strafe button so that your 'backer backpedals into coverage. Don't turn your back and run. Then be patient. Even if no receiver seems to be in your field of vision, one may slip in from the side of the screen. Try to position yourself between him and the QB's line of sight at all times.

A.I. Swats

The A.I. in Madden 2005 is tuned to help you defend the pass. Unlike previous versions of the game, your A.I.-controlled defender will not allow a pass to zing by him if he is in position to swat it. Whenever you control a pass defender, just try to keep him as close to the receiver as possible. This even seems to cause A.I. quarterbacks to hesitate just enough for pass rushers to get to them.

Clog the Middle



4-3 Normal/Double QB Spy: Sometimes you'll want to change up the Cardinals' defense so that the opponent (A.I. or real) doesn't adjust to your base 3-4. Although the QB spy is meant to protect against mobile quarterbacks, it's a good defense against runs and short passing attacks because the defensive backs play a sort of bump-n-run zone and two linebackers clog the middle.

Play Man Short

4-3 Normal/2 Man Under: For short passing situations, this 4-3 defense places a defender in man-to-man defense on each receiver. The two safeties will double-team any receiver running deep. Play as the middle linebacker in this defense to protect the middle of the field.

Defensive Line Moves

By adding defensive line adjustments to the regular defensive line shifts, Madden 2005 enables you to customize your interior attacks. Use defensive line shifts to move linemen into the gaps or shift to one side. Then use defensive line adjustments to crash in or rush outside. In general, shift toward the strong side of the offensive line (where the tight end lines up). For obvious passing downs or against a shotgun formation, pass rush outside.

Linebacker Moves

Madden's new linebacker adjustments with regular linebacker shifts also make for creative defenses. Use defensive line shifts to position your 'backers. With the Cards in a 3-4 alignment it's generally good to spread out the linebackers or shift them toward the strong side of the offense. You can then add a single linebacker blitz or an all-out blitz to any shift by using the linebacker adjustment controls. There are a lot of passes over the middle so don't blitz inside too often.

Double-Teaming Receivers

It makes sense to double-team a star receiver like Randy Moss of the Vikings, but you might want to make that adjustment for any receiver who gets hot. Use the secondary adjustment controls to shift the safeties' zone coverage to the side where the hot receiver lines up or use the new individual matchups feature to double-team any specific receiver or receivers.

Stick Licks

The new Hit Stick move adds a little nasty to your tackles. As your tackler gets near the ballcarrier, just flick the right analog stick. Try to be about a body length away. But remember: hit the stick too early or late and your guy ends up clutching at air with a bad case of turf teeth!

On kickoff and punt coverage good Hit Stick technique can cause a game-changing fumble.

On defense, Hit Stick moves can drop a ballcarrier for a loss, cause a fumble, or totally disrupt a running play. Here, your outside linebacker lays a Hit Stick lick on the running back.

Laying the Wood

Try to make your defenders nail a receiver as he's trying to make a catch. Just as the pass arrives in his hands, hit the dive button or flick the Hit Stick to put a hurt on him. Often, you can dislodge the ball for an incomplete pass and sometimes cause a fumble.

Help on Coverage

If you decide at the line of scrimmage that you want the defensive backs to concentrate coverage on a certain side of field, press the secondary adjustment button and press the right analog stick toward that side. The safety on that side will play a cheat zone in that direction. This is a good move when it looks like the offense will flood one side with receivers or a receiver goes in motion to one side.

Avoid Playing DB

Every Madden player has a favorite position he likes to play, but defensive back is the toughest in the game. Because of the way the screen is set up, you can't really see receivers and DBs when they're split wide. Until the ball is in the air, let the A.I. do DB chores.

Normal Nickel

Nickel-Normal/DE Contain: There's nothing fancy about this nickel defensive set, but it's good to use as the base defense against a passing team because the defensive ends are set to charge wide which helps against a run or a pass. The ends contain the wide sides of the field.

The Spying Game

Nickel-Normal/Man QB Spy: Running quarterbacks like Atlanta's Michael Vick or Cleveland's Jeff Garcia can cause headaches during passing downs because they pose a double threat. In obvious passing situations, this pass defense assigns a defender to follow the QB around. Although you can set up a spy at the line of scrimmage, calling this defense in the huddle enables you to concentrate on adjusting your pass defense against other tactics.

Pass Prevent

Nickel-Normal/9 Velcro: Here's a solid prevent defense you can use when you know your opponent has to pass. It has five defensive backs in the game, and your defenders are playing zone in the flats with four guys deep. To be less predictable when you use this defense, change the individual matchups to set up bump-n-coverage on the wideouts. Tough.

Red Bird Offense

The Slant

I Form-Normal/Slant: The I Form-Normal slant pass is deadly. Watch how the linebackers drop into pass coverage and then flick a pass to the open wide receiver. Because the pattern develops quickly from a running formation, use a run as an audible to make the defense play both pass and run. No matter what team you use, master the slant passes in your playbook.

More Slants

Weak I-Normal/Slant: This slant pattern also works well for the Cardinals. It develops a little deeper than the I Form-Normal slant. If your receiver has inside position on the DB, it's almost always a completion. The receiver breaks into the heart of the pass coverage, and the ball is passed before the linebackers even know what hit 'em.

Nice Option

Singleback-Normal/Boldin Option: Here's a good option pass play that features your best wide receiver. Boldin (No. 81) will either go deep, angle to the sideline, or cut back (see sidebar, "Option Routes") depending on how the defense plays him. With all its passing options, this is

a good play around which to build your offensive attack using a singleback formation.

Read the Pass Coverage

Learn to read the defensive pass coverage if you like option passing. Here's the Boldin Option well-covered with two linebackers rotating into the passing lane and a DB covering deep. Why did McCown try to force this pass? When you call an option from the playbook, determine how far down the field the receiver will make his first decision. If he runs by that spot, you'll have a good idea of how to throw the pass.

Passing Lanes

Consistent passing in Madden is all about seeing the passing lanes—open pathways between the defenders from the QB to a receiver. Here's a nice one with QB Shaun King (No. 4 at the bottom of the screen) firing a bullet to Fitzgerald (top of the screen) who's running a Weak I-Normal/Slant pattern. Notice that he also has inside position on the defender.

Ten-Yard Pickups

Singleback-Normal/Ace WR Drop: When you're looking for a 10-yard pickup, try this play. You can see in the screen that the receivers (top of the screen) are going to cross with two crossing deep and one cutting the opposite way underneath. If you have time, the man underneath always pops open. If the pass rushers are pressuring you, look for a quick pass to one of the receivers cutting across the top of the screen.

Killer Curls

I Form-Normal/Curls: When you're looking to pass from inside the 10-yard line, a curl pattern is a good call. In this pattern, three wide receivers make curl moves. They drive the defenders back and then quickly turn around to establish inside position. Once that happens, your QB can take as much time as he needs to pass; the defender never recovers.

Deep Dropbacks

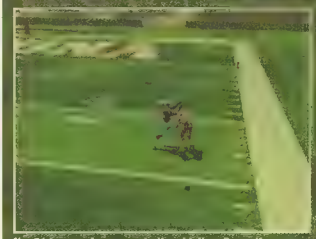
At the goal line especially, drop back as far as you want before you pass. This move buys you time to find an open receiver. Because this isn't real football, your passes will still be accurate no matter how far back you're standing. It's also easier to drift to the side to pass or take off on a scramble from this position.

Option Routes

The many great additions to Madden NFL 2005 so far include the option route, where the QB gives wideouts three potential pass patterns. Depending on the reaction of the D, defense after the snap of the ball, your receiver will "choose" a route to run. To complete the pass you have to read the defense, watch the move, get open (or close), and not get tackled (a sack, of course), and make the correct button press.

Here's Singleback Normal/Boldin Option. Boldin (#81 on the right) has an option to run three possible routes—short, deep, and out (displayed in orange).

Here the receiver "reads" that the defense is playing a zone so he cuts back between the zone defenders. Press and hold the pass button.



No. 81 has made a move to the sideline. Press the pass button to left a touch pass over the defender.

If No. 81 is being covered by a lone defensive back (single coverage) he may decide to go long. Let him run and tap the pass button to throw deep.

Punch It In

I Form-Normal/FB Dive: When you're in a short yardage situation or at the goal line, the fullback dive is quick-hitting running play. The Cardinals' fullback, James Hodgins (No. 42), is not quick, but he's a bruiser who can get you the tough 1–3 yards you need.

Slidin' Inside Runs

I Form-Normal/HB Slam: The HB Slam is another quick-hitter from the I Form-Normal set that's good for a yard or two. If the A.I. defense shifts into your running lane prior to the snap, change directions. If it shifts again, change again. The defense rarely shifts more than once.

Cool Counter

I Form-Normal/HB Counter Weak: This counter play by the halfback usually produces positive yardage. You fool the defense by running to the weak side away from the side where the tight end is set up to block. Be ready to cut either inside or outside the fullback (No. 42) block depending on how the defense reacts to the run.

Run with Power

Strong I-Normal/HB Off Tackle: Sometimes you just need to saddle up your horses and run with pure power. In this offset I formation running play, the halfback should run right up the fullback's butt. The tackle, the tight end, everyone and their mothers is blocking to the side that you are going to run. This is pure power football for short yardage or a big gainer.

Short Yardage Gainer

Strong I-Normal/FB Dive: When you need a few tough yards, give the ball to your fullback in the strong I fullback dive. This is a quick-hitting play where all the blockers just hit somebody to surge forward and create a crack for the fullback to run to. The halfback takes off to the outside to add a little deception to the play.

Trouble in Four

Singleback-4WR/Slot Cross: The four wide receiver set is another potent weapon for the Cards. In the slot cross, one of the two inside receivers almost always beats his man with inside position. In this screen, you can see that the flanker at the top of the screen is already open. (Yup, this play is like a slant in disguise.)

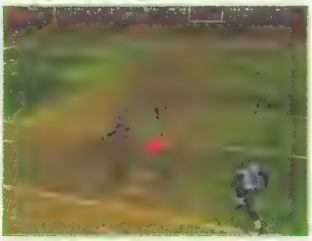
Run from a Passing Formation

Singleback-4WR/HB Sprint: Here's a solid running play from a passing formation. Because the four wideouts are spread out, the defense has to play up to defend the pass. The halfback can attack the weak spot in the defense and scoot into the secondary. You can also make the Singleback-4WR/Slot Cross pass an audible here and switch to that pass play if you see an opening when the defense lines up.

Going Deep

Singleback-Normal/TE Streak: The Cardinals mount a potent deep threat with this play. It sends three receivers (including the tight end) on streaks while the flanker makes a deep slant. Watch the safeties and then pass to the receiver with single coverage. Sometimes the flanker breaks open early. When you need to move quickly down the field, this is the play to use.

Deception Reception



Singleback-4WR/Flair: Sometimes secondary receivers are open in plays designed for someone else. This is a flair pass from a four wide-receiver set. It's meant to produce a short gain with a quick pass to the halfback on the side. But more times than not, the flanker on the left is open over the middle because the defense

is playing up for a short pass. By the way, that halfback is a good safety valve receiver if the flanker's covered over the middle.

Fourth Down Heroics

If you're playing the A.I. and it's fourth down with just a few yards to go for a first, consider passing for it. The Cardinal passing attack features plenty of playmakers. Here, rookie Larry Fitzgerald makes a fourth down catch. (Yes, he's running a slant.)

Special Special Teams

Kicking's Game

Kicking is more challenging than it looks. Although Madden 2005's kick meter is much improved with indicators for Power and Accuracy, trying to use your eyes to guide your button presses can send a critical extra point wide of the mark. You should still try to develop rhythm and timing on the practice field.

Kickoff Strategy

If you kick to the side of your kicker's strong leg, you can open up lanes downfield that make it easier for your team to cover kickoffs. Because the Cardinals' kicker is right-footed, select Kickoff Right. Then, angle the kick a little more to the right by pressing R twice. Now after you kick, at least three cover men should have a clear shot at the returner.

Hit Stick Moves

The Hit Stick is great for downfield tackling (see sidebar, "Stick Licks"), but it also gives you a chance to recover if you're out of position on a return. Even if the ballcarrier runs by you, turn and flick the Stick. You can jump on him from behind.

Return Blocking

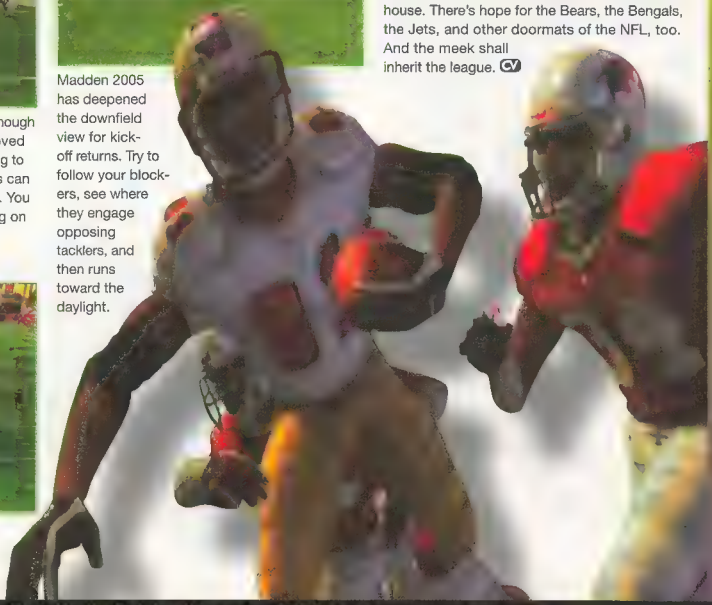
Madden 2005 has deepened the downfield view for kickoff returns. Try to follow your blockers, see where they engage opposing tacklers, and then runs toward the daylight.

Fair Catch

When you're receiving a punt, call for a fair catch if opposing coverage men are bearing down on you. Control the return man and hit the fair catch button. If you don't, you almost always fumble when you get hit.

Give 'Em the Bird!

Use these tips and plays and the lowly Cardinals transform from little peckers to football powerhouse. There's hope for the Bears, the Bengals, the Jets, and other doormats of the NFL, too. And the meek shall inherit the league. CV



PROSTRATEGY GUIDE

Staying Stealthy, Wealthy, and Wise in...

Thief: Deadly Shadows

This ProStrategy Guide explains all the techniques you need to profit from the dark, haunted world of Thief: Deadly Shadows. The guide also maps out the toughest mission objectives and even releases the location of those priceless Special Items.

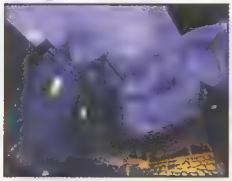
By Vicious Sid

This ProStrategy Guide applies to the game's Normal difficulty level; you can expect to face more guards, tougher combat, and loftier loot quotas at the higher difficulty levels.

The Art of Silence

Never forget that your eyes and ears are your primary means of defense. If you ever want to move higher than petty theft, you must learn to harness your most basic abilities.

Navigation



It's easy to get lost in the dark, so use the compass (at the bottom of the screen) and the map (press Start and look under "Gear") to stay oriented inside the sprawling environments. If you get lost or confused, double-check your mission objectives. Also, remember to read all letters and open books—they often trigger important events or missions. And above all else, save frequently!

Infiltration

When picking locks, the secret is to use a systematic approach. Watch the lower-right corner of the screen (the metal rings) while carefully testing each direction with your lock pick (use the thumbstick). When you hear the clicking and see the ring jiggle, you're close to

RIGHT THUMBSTICK = Turning and Aiming

the "sweet spot;" continue holding in that direction while tapping R to advance to the next tumbler. Repeat, and *voilà!*

Evasion

The best way to remain concealed is to stay crouched (tap X) in the darkest shadows. You can also stay concealed by flattening against a nearby wall (tap B) or leaning around a dangerous corner (press and hold Left or Right on the directional pad). The Light Gem at the bottom of the screen gauges your visibility at all times—it's a crucial tool in your arsenal.

The sound of your footsteps quickly attracts enemies, so wait for them to turn their backs before you start scampering around. Also, avoid traveling over loud surfaces like metal or tile floors—a Moss arrow can help muffle your footsteps.

Fun with Factions

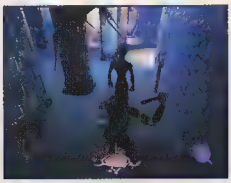
After you enrage the Hammers and the Pagans (by stealing the Builder's Chalice and Jacknall's Paw) early in the game, you should try to win back the blessings of both factions right away. Check your Faction status by entering the options menu (tap Start). Performing favors boosts the meter for that faction. Attacking or stealing from a faction lowers your status meter.

Fight and Flight

When confronted with trouble, the resourceful thief knows to just dig a little deeper into his bag of tricks.

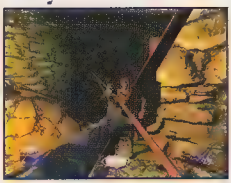
Blackjack Attack!

Because the Blackjack can defeat any humanoid with one silent blow, it's definitely the preferred tool for stealth operations. As you approach the target from behind, wait for Garrett to raise his arm and then let 'em have it. Remember to hide the body in a dark place.



A similar move exists for the Dagger, but the screams will attract the worst kind of attention. Better to stick with the silent, nonlethal Blackjack. If your target suddenly gets suspicious and draws a weapon, however, you won't be able to perform any sneak attacks. Wait for the stink to blow over before trying again.

An Arrow For Every Occasion

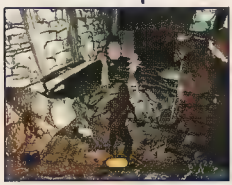


Broadhead arrows are cheap, plentiful, and have the ability to kill unaware humans with one shot. Fire arrows pack a bit more punch and are best saved for use against Statues and the undead. Buy them at the Docks.

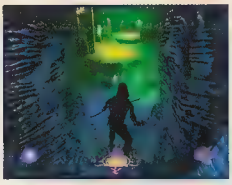
Moss arrows can immobilize a group of human enemies, giving you plenty of time to escape. The moss also muffles the sound of your footsteps. Buy them at the shop in Stonemarket Proper. Gas arrows are another nonlethal way to neutralize a group of enemies, but you can only hold five at a time. Buy them in Old Quarter.

Water arrows perform much of your dirty work: They extinguish torches and small fires, wash away splattered blood, and even make moss patches expand. The shop in the Black Alley of South Quarter sells them; try to carry at least 15 Water arrows at all times.

Tricks and Traps



Always keep plenty of Flash bombs on hand to blind any guards who stray too close. As a bonus, the bright light also zaps zombies—try to score a direct hit for extra damage. Oil flasks have multiple uses, too. The oil puddles can create both flaming barriers (ignite it with the Fire arrow) and slippery traps (pour oil on a staircase).

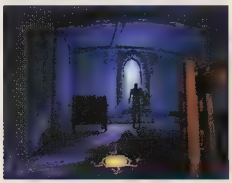


Gas arrows can knock out a cluster of guards almost instantly, but they become widely available only once you complete the first few Keeper missions. Explosive Mines are more rare and should be saved for the toughest enemies (especially Statues). Holy Water is the most rare item of all (search Fort Ironwood), but it's an all-powerful weapon against the undead.

Walkthrough

This guide follows one path through the game, but alternative routes are everywhere. Furthermore, this walkthrough focuses on cracking the key mission objectives and completing the game, and not on outlining every small-time quest found within the City. Keep your eyes open, and you should do fine.

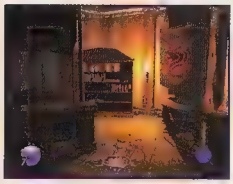
Rutherford Castle



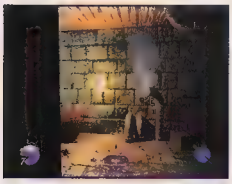
This heist represents the first true test of your thieving skills. You can start by dousing the lion's head torch and ascending the ladder, but it's much easier to pull yourself up (press and hold Y) into the window on the west side of the main doors. The next room has an important note, some loot, and a Health potion if you need it.

When you find these two handmaidens in the Inner Quarters of the castle, wait until they separate

before silently clobbering them with your Blackjack. Hide the handmaidens, loot the dining room next door, and then head into the kitchen to take out Morris the cook. The cook's diary speaks of a hidden switch in Lord Ember's chambers, which is located to the south. To get there, take the elevator outside to the second floor.



Clobber Lord Ember inside his chambers, loot the room, and then hit the switch next to the desk. This opens the vault, which means the **Bloodline Opal** is now up for grabs. Before you leave the Inner Quarters, head north to loot Lady Elizabeth's chambers.



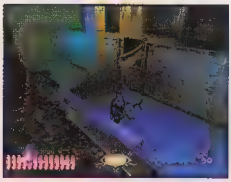
The vault is located on the western side of the Castle Front not far from where you first entered the castle. Once you've completed all your mission objectives (including meeting your loot quotas), head back out the main gate to end the mission.

Special Items

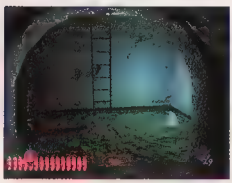
The **Gilded Helm** lies within the chest in Lady Elizabeth's chambers in the northern tower of the Inner Quarters. The painting of **Mortimer the Mad** is located on the second floor of the Castle Front; push aside the box in the southwest corner to uncover a passage leading to the painting. The **Rutherford Medallion** is easy to find—it's just above the fireplace in Lord Ember's quarters.

Pagan Sanctuary

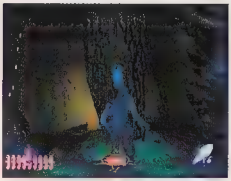
After you meet with the Keepers in Terces Courtyard (at the northern tip of Stonemarket Plaza), you can enter the small well in South Quarter (on the east side) to begin this mission. Inside the tunnels, wait for the adventurers to finish talking. When the first guy walks off, blackjack his buddy and then snag the Fire arrow from the campsite and the loot from the ground. Ahead, the Pagan guards attack the adventurer; wait for the dust to settle and then pick off the Pagans with your arrows.



The tunnels ahead of you are tight and well lit, so fire a few Water arrows. Watch for the Pagan Shamans that patrol near here; if you sneak up on one and steal his wand, he'll be unable to cast his potent spells. When you come to the sewer area, you can blast the patrolling Tree Beast with a Fire arrow or sneak past him to conserve supplies. Stealth blows don't work on these monsters. Head north to the upper level and then ascend the ladder.

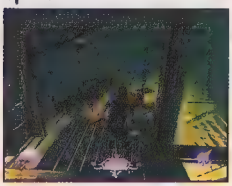


At the top of the ladder that leads from the tunnels, read the note on the wall to learn of the **Ritual of the Root** (and a new objective). To the southeast is an abandoned Hammerite factory that now doubles as a Pagan training facility. You can defeat the training guards by sneaking to the far staircase and then crushing them with the huge gear on the ceiling. Once you're finished neutralizing the guards and pocketing the loot, it's time to head northwest to the Shaman's quarters.



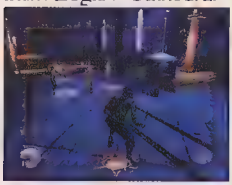
The Shaman's room details the **Ritual of the Root**, so head down the dank staircase toward the northwest corner of the map. Once at the Taproot, avoid the Tree Beast or fry it with a Fire arrow. The ritual is easy: Shoot a Water arrow at the left symbol and a Moss arrow at the right symbol, and then throw a body onto the center altar and blast it with a Broadhead arrow. Now that you have **Jacknall's Paw**, return west to the ladder to complete the mission.

Special Items



The **Precious Comb** is tucked away above the Shaman's room (located in the Sanctuary) in the southwestern corner of the map. Cross the narrow beam to find another bed; the comb rests on a beam above the pillow. The **Bronze Beatle** is easy—it's in a chest in the room marked "Sleepsie" on your map. Finally, you can find the **Ancient Statuette** in a room above the deserted Hammerite factory. It's on the far-eastern side of the level; you can take the nearby broken staircase up above the factory.

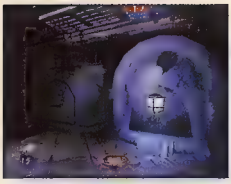
Saint Edgar's Cathedral



Once you take out the guard and enter the Hammerite church, proceed to the darkened chapel. Eavesdrop on the Hammerites and then grab the loot and note from the table. The note mentions a **Holy Symbol** that resides in the high priest's chambers. Head east into the courtyard.

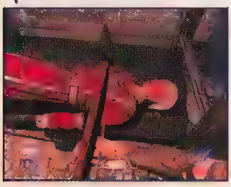
Climb the stairs in the East Courtyard to find the high priest's chambers. Beware of the guard and priest inside—try to lure them outside the room so you can deal with each individually. Take the **Holy Symbol** (a tiny hammer) from the table and read the note. It seems you need to find an **Unstamped Gear** to reach your ultimate goal—the **Builder's Chalice**. Head west back through the chapel to reach the Factory.

At the entrance to the Factory, don't miss the Gas arrow on the small table. Head south to find an important note, then climb the nearby staircase and neutralize the patrolling priest (remember, magic users are helpless without a wand or staff). Cross the balcony, descend the steps, and then head south past the Transform Regulator. The Storage Area is dead ahead: Grab the valuable items and the **Unstamped Gear** that lies on the tiny shelf. Almost done!



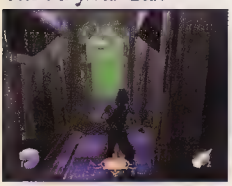
West of the Storage Area rests Inspector Drept's office (you learn more about him later in the game). For now, loot the surroundings and pass north through the zombie prison. You can find the huge Stamping Machine ahead on the left. Remember to take back your gear once the stamping process is complete. Head east to the Reliquary and insert the **Stamped Gear** and **Holy Symbol** into the machine. The **Builder's Chalice** is now available to the north—it's been lowered into a cage. Grab it and then leave this mission via the entrance in the Cathedral Grounds.

Special Items

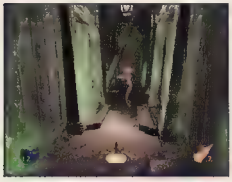


The **Cat-o-Nine Tails** is locked inside the chest in the High Priest's room east of the darkened main chapel—careful not to wake him! The **Statue of Saint Edgar** is found inside the chest where the **Holy Symbol** resides (it's north of the barracks). Finally, you can find the **Codex of Admonitions** in the far northwestern corner of the Cathedral Grounds.

The Abyssal Gale



Overhearing a conversation in the Keeper Compound triggers this mission. Before you can find the golden **Compendium of Reproach**, you must infiltrate the Abyssal Gale in order to determine the fate of the crew and cargo. Be sure you're packing plenty of Flash Bombs, Health potions, and Mines. Don't miss the Holy Water stashed to your right when you first enter, either—this place is crawling with the undead, so sneak past them whenever possible.



Many of the zombies here are fond of playing possum, so don't go rushing around. Creep your way to the lowest level and enter the room with the manifest. Watch out for the zombie lying on the floor—Flash bomb it before it springs to life. Grab the loot and the manifest, and then climb the nearby ladder to complete the mission.

The House Of Widow Moira

After completing the Abyssal Gale, you must steal the rowboat in the Docks to reach the (former) captain's estate. The **Compendium of Reproach** is somewhere within this massive mansion. Luckily, this is a cut-n-dried mission that doesn't offer too many surprises. You do, however, use plenty of Water arrows. When you reach the guards playing cards, sneak past them and go up the stairs. After you blackjack the next guard, you can enter the Overlook Proper through the main doors.

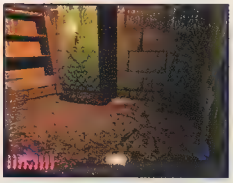
After talking to the widow (she sits on the east side of the first floor of the Overlook Proper) and taking her key, you can hear the captain's final message (via Viktrola) in the northern room of the first floor. Now you need to reach the captain's study—it's on the second floor of the Overlook Proper in the southeastern corner. Hit the switch under the desk then rush to the north end of the map and the gallery. Inside the North Gallery is a secret passage; enter it.

When you finally locate the **Compendium of Reproach**, it's nice to leave the cash inside the chest for the grieving widow—you don't need to add to her misery. Besides, she'll send a thug to your apartment if you don't leave the money. When you've completed your loot objectives, return to the rowboat to end this mission.

The **Lucky Coin** is on the table in the southwestern dining room of the Overlook Grounds (see above). The **Widow's Mirror** is found on the first floor of the Overlook Proper. It's in the bathroom just to the east of the Viktrola (and the Captain's final message). Finally, **Nereid's Telescope** is located on the second floor of the Overlook Proper on the desk in the Rotunda—it's in the very center of the map.

The Sunken Citadel

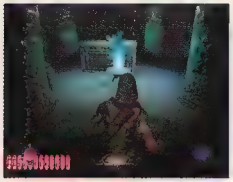
To trigger this mission, you must read the book in the Keeper Compound that refers to the Sunken Citadel; walk out of Orland's office and make a left to find the right book. Once the mission is active, head to the Docks and find the alley across from the South Quarter portal. Climb down the ladder to enter the sewers.



Once you begin the mission, dispose of the Kurshok guards patrolling the main chamber. They may be fierce fighters, but you can club them like you would a human. Follow Keeper Rafe's red glyphs (found on the walls and floors) south through the Theatre, where you can snipe or Gas arrow the two Pagan guards. Continue on to the southeastern sector of the Citadel Core. Head south until you find Rafe's skeleton in a small room near the Library. Read his diary and take his **Glyph Key**.

Pagans also patrol the areas near the Arena and Bath House, so you may be able to sneak by while they fight the Kurshok guards. Head to the northern tip of the Citadel Core to find the Throne Room and the **Kurshok Crown**. Slip into the room, neutralize the guards, and then steal the crown. Slink back to the citadel's entrance to complete this mission.

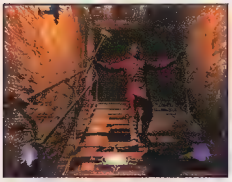
Special Items



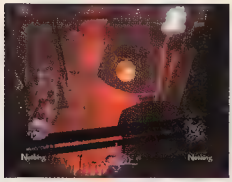
The **Battle Horn** lies beneath the Arena (the huge room with the green eggs in Outer Citadel). A **Red Crystal** lies on the north wall of the Theatre up on the platform near the two Pagan guards. Finally, the **Kurshok Tapestry** lies above the throne room on the southwest wall. It's small, so look closely.

Clocktower

You need the **Climbing Gloves** (sold for $2000 in the shop at the Docks) to reach this location. It's near Terces Courtyard in the north part of Stonemarket Plaza; climb the wall to access that pipe, which leads you to the glowing blue mission glyph.



In the pendulum room, take out the Hammerite guards in the usual way, but don't miss the Holy Water located in a crawlspace below the clock's face. Head down the nearby ladder, bash the guard, and then grab the clock plans and the loot. The numerous staircases leading to the basement make for effective traps—just coat them with oil and lure your victims to their doom. Continue down to reach the Lower Clocktower.



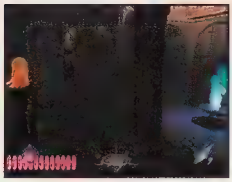
To sabotage the tower, you need to pull the **Coal Dispenser** (in the northeast corner of the floor above the bottom floor, located outside the Foreman's office) and **Steam Release** levers (on the same floor but in the southeast corner). Finally, you must activate the **Halting Mechanism**—it's located in the center of the bottom floor, just in front of the huge gear. Be sure all your objectives are complete before you pull the **Halting Mechanism**; it causes the Clocktower to come crumbling down.

Special Items

You can find the **Diamond Gear** at the very beginning of the level; it's in the northwest corner of the top floor (with the huge pendulums). You need to climb up to get it. **Debole's Solace** is located one floor down under the desk where Father Debole's journal and map are located. Finally, you can find the **Builder's Ingot** in the Lower Clocktower; from the starting level, head down two floors and look in the southeast corner of the map.

Keeper Compound

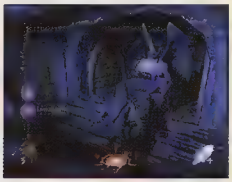
Once you've leveled the Clocktower and returned to the Keeper Library, Orland deactivates the glyph portals. You find yourself in Old Quarter, running from deadly Keeper assassins. Their projectiles are lethal, so keep moving. Find your buddy in the south-central part of the map and then return to your apartment in South Quarter. Finally, reenter the Keeper Library by crawling up the wall just west of Terces Courtyard—an entryway lies just above the red glyph.



In the Library, head to the second floor to find Orland's office and then find the glyph on the floor in the corner to enter the Compound. Once inside, crawl through the gate to learn of an impending Keeper vote. You can neutralize these two Keepers to ensure that some rare books stay put in the Elder Library. It's optional but fun.

Your main objective lies within Artemis's chambers; that room lies in the northeast section of the building near the Dormitories. Loot Artemis's room, but make sure you grab the **Keeper Ring** hiding in the upper-left corner of the chest; it's surprisingly easy to miss. You need this ring to access the secret passage on the second floor. Look for a tiny hole in the small, dark alcove on the second floor just past the first statue. Activate it to access Orland's quarters.

Inside Orland's quarters, be sure to read the notes and journals for important information. Then, grab the seal from the wall and toss it into a fire or just blast it with a Fire arrow. Either way, melting the seal unlocks all the glyphs for you again. It's about time! Now head back to the Elder Library, where you can now use the glyph to access the Lower Libraries.



Once you're finished looting, head to the northwest corner of the Lower Libraries to find Caduca's body. Next, take the note from the gargoyle's mouth. Somebody knows you're here, but whom? Head south to the Hall of Statues to confront your tormentor.

These Statues are invulnerable to almost every form of attack, and their melee attacks inflict massive damage. For now, you can only defeat them with two Fire arrows or a single mine. Fight through or avoid the Statues while heading east. When you come to the glyph in the northeast corner of the Lower Libraries, activate it to complete the mission and proceed to Old Quarter.

Special Items

If you kept the two Keepers from voting at the beginning of the level, the **Imbris Analects** book will remain on the table in the Elder Library (otherwise, it ends up in the Scribe room). The **Golden Scales** also resides in the Elder Library above the south wall, so you may need to climb to reach it. The other volume of **Imbris Analects** is

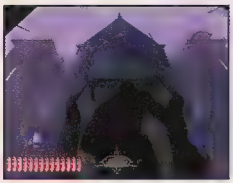
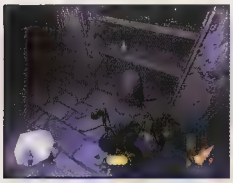
found in the dining room on the far-west side of the compound.

The Shalebridge Cradle

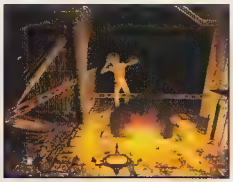
This mission becomes available once you speak with the esteemed Inspector Drept—he lives in Audale close to the tavern in the southeast corner of the district. Approach his window and then head back to the southeast section of Old Quarter to locate the Shalebridge Cradle. Be sure you're stocked up on mines, Fire arrows, and Health potions before entering.



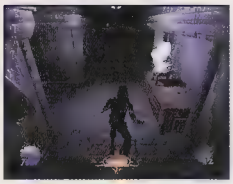
Enter the Outer Cradle through the side cellar door (don't miss the Water arrows in the fountains) and then head upstairs. Grab any loot you find as you head south to the Treasurer's office. Follow the strange noises up to the Attic, where you meet Lauryl. Grab a fuse from the box and then head back down to the Storm Cellar via the ladder.



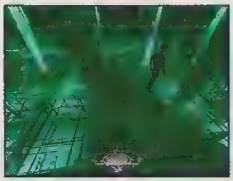
Swap the blown generator fuse in the Storm Cellar with the fresh one from the Attic; you need power to open the portcullis door upstairs. Also, make sure you pick up the **Blood Vial** from the northern area of the cellar. Head for the Lobby (the room with the stairs near the center of the map) and pour Lauryl's blood down one of the drainpipes. Head for the portcullis across from the Lobby—the switch functions now—and proceed into the Inner Cradle.



These zombielike creatures are a real pain. To destroy them, try Holy Water, mines, or a few Flash bombs. Your immediate goal is to grab **Lauryl's Nightgown** from cell #5 (located on the west side of the Inner Cradle). It's in the cell with the telescope; you can remove the false bricks on the far wall to reveal the nightgown. Take the gown east to the Morgue, skipping the noisy elevator in favor of the ladder. Sneak past the zombie to reach the furnace and then burn the gown. Don't forget to grab the Fire arrows from the hot coals.



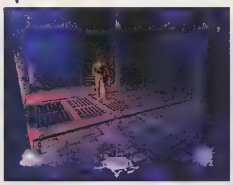
You must reunite a specific item (such as the unlit candle, the wax mask, or the rusty telescope) with a unique location in the asylum. The open book in the Hall of Records (at the center of the Inner Cradle) provides all the clues you need, and the cell block on the west side of the floor contains the items. You may as well grab all the items while you're there and then place whichever one is most convenient. It doesn't matter which.



Now you've been transported into the twisted memory of the haunted building. The problem is you're totally unarmed. You mustn't let the spectral staff members see you, even for a moment—if they do, they'll banish you back to reality. The most convenient tactic is to save frequently and reload your game if you get caught. Keeping to the shadows, head east to the Nursery Tower. Creep past the patrolling Specter, grab **Lauryl's Diary** (it's next to the bed), and read the book at the podium. Return to the Morgue to burn the diary; watch for the Specter near the furnace.

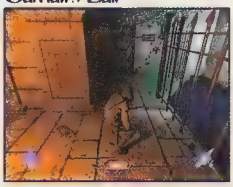
Next, head north to find the **Dissolution Solution** in the Treatment Room. Finally, head south (back through the portal) to reach the Outer Cradle. Head for the Attic and clean up the bloodstain. Lauryl's got some bad news for you, though; you must head back to the Storm Cellar and lock yourself in the jail cell. This transports you back to the shadow world, but this time, you've got your weapons with you. Fight past the Specters to reach the Staff Tower. At the top, ignore the group of sitting Specters and jump onto the table. Hurl yourself from the window to complete this spooky mission.

Special Items

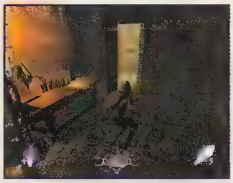


The **Gold Teeth** are easy to find; they're in the cadaver room next to the Morgue on the east side of the Inner Cradle. The **Surgical Kit** is located not far away in the Treatment Room north of the Morgue. Finally, the **Gravecourt Red** wine is stashed in the safe in the Treasurer's office; it's on the southern tip of the Outer Cradle, quite close to the attic stairs.

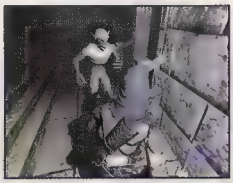
Garnall's Lair



After putting Lauryl's spirit to rest in Fort Ironwood and speaking with the Keepers, it's time to loot Garnall's Lair. She resides within the Audale canals. First, you need **Dyan's Amulet** (found in nearby Audale Park) to gain access to the Pumphouse. Once you drain the canals, you can enter them to find Garnall's Lair.



Inside the lair, head northwest to Garnall's bedroom and then use the book (on the far left) to activate the hidden door. After the cinema, use the **Glyph of Unbinding** on the far northern wall. Now you can destroy those pesky Statues with four regular whacks from your Blackjack or with one stealth attack.



Now it's time to steal back **Jacknall's Paw** (located in the eastern side of Garnall's Lair) and the **Builder's Chalice** (which rests in the southwestern chamber). Your enhanced Blackjack should make short work of the Statue guards, but feel free to break out some mines or Fire arrows if the Statues gang up on you. Once you have both artifacts, return to the canals to finish the mission.

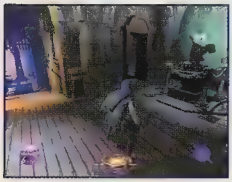
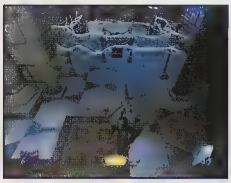
EXPERIENCE COUNTS

Wieldstrom Museum

Once you complete Gamall's Lair, you find the city overrun by statue guards. It's no good to enter the museum through the main gate, so open the grate in the doorway to the left of the main entrance and climb down into the tunnels. Before beginning this massive mission, be sure you have plenty of Water arrows, mines, Gas arrows, and Health potions.

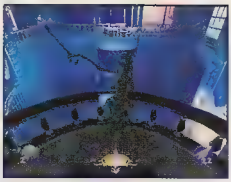


A torch-carrying guard patrols the main gate; you can douse him with a Water arrow. Defeat the patrolling guards to earn a key and entrance to the museum. Inside the museum, you can find mountains of loot in almost every room so be sure to fill your pockets at every opportunity.



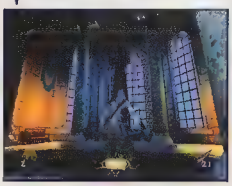
The **Kurshok Crown** is in the West Wing close to the museum's entrance; just head left upon entering the museum. A deadly lightning field protects the crown. You could take out the power station (which lies to the northeast) to disable the security system. A much easier way is to splash the electrodes with your Water arrows. You only have a second to grab the crown before the field switches back on, but that's just long enough.

The **Heart** is located on the far-eastern side of Porter Hall; head right from the central portal that leads to Tesero Hall to find it. You may want to launch a few Gas arrows to clear out the room before proceeding inside. Like before, you can disable this electric field with a lowly Water arrow. Just one more artifact to go!



The **Eye** is a bit trickier to obtain. It's located on the tip of a gigantic statue situated in the huge central chamber of Tesero Hall. First, you must head for the Curator's office; it's upstairs toward the southeastern part of the floor. In the Curator's office, head onto the tiny balcony and hit the switch to raise the statue into view. You can now reach the **Eye** by heading to the second floor and standing at either the eastern or western balcony. Wait for the statue to rotate close to you, then snag the **Eye** from the tip of its wand.

Special Items

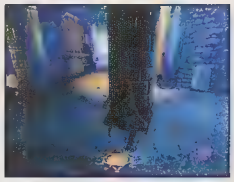


Look for the **Curator's Monocle** in Porter Hall behind the glass case on the second floor filled with Cornelian antiques. The **Orbetti Forgery** is located on the third floor of Porter Hall; head down the southeastern hallway leading past the Tesero Hall entryway. The painting is in the room at the end of the hall. Double back to the Tesero Hall portal. Once in Tesero Hall, you can find the **Coethe Medallion** on the huge statue on the far-western side of the level. Shoot the medallion with a Broadhead arrow and then scoop it off the ground after it falls.

Final Mission

The following information may contain spoilers, so read it at your own risk.

Your final goal is to place all five artifacts at several important landmarks around the city. But in a last-ditch effort to foil your plans, Gamall herself patrols the city streets. She's completely invulnerable and can inflict massive damage, so sneaking past her is your only choice. Start by placing the Heart in the socket at **Bradshaw Monument**, which is located northwest of the center of Audale.



Next up is Fort Ironwood, located in the southern tip of Old Quarter. Inside, head through the back and up the stairs to the balcony. When the statue guard passes, quietly hop down to the graveyard and wait in the shadows until the ruckus dies down. Gamall guards the **Cataclysm Memorial** in front of you; try luring her away with a Noisemaker, then placing the Chalice. If you need a quick escape, try climbing back to the balcony.

Now you need to insert Jacknall's Paw into the **Landing Marker** at the Docks; you may want to stock up on some Health potions as you pass the nearby shop. Once you've placed the Paw at the post (it's the one with the plaque guarded by Gamall), hightail it back north.

Hopefully, the local Pagans and Hammerites should keep Gamall and the Statues busy while you slink through the streets to the northern tip of Stonemarket Proper. Obviously, you want to have both factions on your side by this point; otherwise, you can expect to fight the entire neighborhood as you place these artifacts. Place the Kurshok Crown in the receptacle at the **Clocktower Base** and then head back south.

Only the **Eye** remains, and you must place this artifact last of all. Return to South Quarter and place the **Eye** in the socket at the **Fountain**. Goodbye, Gamall! GV

Planes of Existence

Once wrought in two dimensions, can it survive existence in the third?

The question of dimension is one that has puzzled physicists and mathematicians for millennia. If two dimensions are flat and we exist in three dimensions, what is time? Are there infinite dimensions? Are we infinite beings limited only in our perception? The boundaries that divide dimensions are difficult to see, and it's impossible to predict what will happen when someone...or something...crosses over.

That's why no one can tell what will happen when a hugely popular 2D video game franchise makes the transition to 3D. How many classic game series have been all but ruined by the Z-axis—and how many more have yet to be destroyed? Bubsy couldn't do it. Yet there are many games that made this transition intact; many became somehow more whole, more complete. While we at *Code Vault* don't pretend to understand this phenomenon, we can pretend to study its aftermath. So here for your consideration are five games that successfully made the dimensional leap from 2D to 3D. Let's see what we can learn....

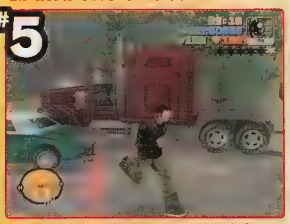
Parallel Dimensions: Grand Theft Auto III

#5



See, if people wouldn't leave their truck doors open like that, maybe it would only be Petite Theft Auto.

Grand Theft Auto III (PlayStation 2) didn't invent violence; it just perfected it. Grand Theft Auto's first few games were top-down, 2D affairs with the same illicit feel that pervades the quickly-approaching-classic romp through Liberty City; it just lacked the impact in two dimensions. You could be a badass, but you didn't really *feel* like a badass, and the games wound up being notable for their controversial content but not lauded for gameplay. Part III changed all that quite unexpectedly. Crime was there; missions were there; a big city was there; cars were there (to be stolen). But navigating through a living, breathing 3D city with elevated trains, A.I. thugs that held grudges, and cars that differed in handling and rarity suddenly and surprisingly changed everything. GTA III is undeniably more engaging and engrossing by virtue of its third dimension, which afforded new freedom both geographically and ethically. Upon its release, the game was so popular and so often out of stock that many thought it had been recalled due to its content. As for the 2D forebears? They became mere curiosities for people to buy when the third installment was on backorder.

When 3D Goes Awry

Jax smax! Jax blox! Jax sux.

After Mortal Kombat 3, the franchise was way too popular not to spin off into smaller games based on specific characters. Sub-Zero got his own 2D adventure with Mortal Kombat Mythologies, but Jax was cursed with **MK: Special Forces** (PlayStation). Why do Jax and Sonya hate Kano? This game tried to answer that burning question, armed with drab locales (what's the point of 3D if everything looks…boring?), brain-dead enemies, and a lame energy system that only let you pull off cool moves every once in a while. The PlayStation game took forever to come out (usually the sign of a bomb waiting to detonate) and eventually found itself shunted into bargain bins upon release—$20, new! Leave it where you find it; Special Forces is nothing special.

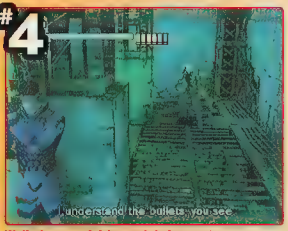
Parallel Dimensions: Metal Gear Solid



Well, they are fairly straightforward.

Solid Snake got his start on the MSX system, but he was known and loved by NES gamers from Metal Gear and its harder-to-find sequel, Snake's Revenge. The clever mix of action and stealth found in those games was a far cry from the hop-n-bop platform games of the day, and it left an impact. When **Metal Gear Solid** was announced for the PlayStation, it was one of those double-edged things—awesome, Snake deserves a new adventure on new hardware...but will it do him justice? Fans needn't have worried; Hideo Kojima and his team took full advantage of the polygonal, spatial environment to create a whole new 3D genre: stealth/action. Line of sight became more important, the noise Snake made became more important, heck, even aiming became more important. The jump to 3D made Snake much more of a special operative with skills that could be leveraged based on the situation. The twisty story line helped a great deal, but make no mistake—Snake really became a rich character when the world he infiltrated became equally rich.

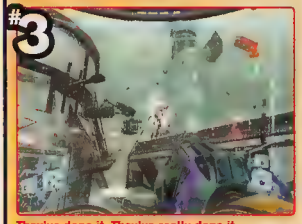
Parallel Dimensions: Metroid Prime



They've done it. They've really done it.

The best thing about **Metroid Prime** (GameCube) is that despite almost everyone's expectations that it would suck, it didn't turn out to suck. It was, in fact, quite extraordinary. But why the initial pessimism? The original NES Metroid and its SNES extension, Super Metroid, were the pinnacle of 2D side-scrolling exploration; it seemed that reimagining it as a first-person shooter à la Halo spelled doom for our beloved Samus. But somehow, the old exploratory get-lost-in-an-alien-labyrintn feel of the original games transferred over to Metroid Prime beautifully, and it wasn't so much a first-person shooter as it was a first-person discovery-of-an-alien-world. Metroid Prime could have been a disaster; instead, it was a game just as good—maybe even better—than the classics it came from.

Three-Dimensional Wish List

Here are five old 2D franchises out there that demand the 3D treatment before they up and invent 4D. What's taking so long?

5. **Splatterhouse**—Resident Evil, Silent Hill, and Manhunt are all scary but sedate. Let's get a real gorefest goin' by reviving Namco's side-scrolling adventure in three action-packed, disgusting dimensions.
4. **Mutant League Football**—Fans have been begging EA to remake its irreverent monster-mash take on pigskin and pugilism for years. Who wouldn't like to see the robust NFL Street engine be put to good satirical use?
3. **Herzog Zwei**—The cultish fan base for this, one of the first RTS games, would love to see it reinvented for a new generation. Imagine Warcraft III meets Battlefield 1942...
2. **Bionic Commando**—His 2D grappling-hook thingy was copied in a million other 2D games but never a 3D one...but as Spider-Man 2 proved, swinging around on a rope in three dimensions is a ton of fun.
1. **Kid Icarus**—No one really knows why this NES classic game is so neglected by Papa N (hell, it's not even in the "classic NES games" series—a travesty!), but we'd love to see it make a comeback.

Parallel Dimensions: Mario 64

Mario reinvented the wheel for tons of action games to follow.

Before you complain that there's another N'ntendo game on the list, remember that the Big N all but had a monopoly on the 2D era with the NES...and it's one of the few old-tyme game-makers still publishing lots of quality stuff today (where's Data East with its Karnov 3D?). That being said, while a couple cute fellas like Croc and Bubsy gave three-dimensional mascot-platforming a miserable first go, **Mario 64** (N64) was the one to nail the control scheme *on the first try*—jumping wasn't frustrating, running was simple, even running around in little circles was joy incarnate. Some may complain that later Mario games like Mario Sunshine didn't push the envelope enough when it comes to further innovations, but you can't deny the impact Nintendo made w th its first try. If there was any danger of Mario slipping into obscurity (it could have happened!), this is the game that kept him alive and kicking.

Parallel Dimensions: The Legend of Zelda: The Ocarina of Time

Nintendo scores a hat trick!

The Legend of Zelda: The Ocarina of Time (N64) is listed on numerous web sites and message boards as the single best game of all time—and it was the first time Link was 3D—so are you surprised it's number one on this list? *Soooo* many 3D gaming innovations came from this game, you can't ignore the impact—lock-on targeting with the trigger button ("Z-targeting" as it was known at the time), 3D level designs that have yet to be rivaled (not even The Wind Waker had a temple as sinister as The Water Temple), and the so-crazy-it-just-might-work notion that jumping doesn't *have* to be frustrating—just let the game do it for you, you may find out it's just as fun! Nintendo realized that existing in 3D could make a serious mess out of control schemes (the complexity could increase exponentially, in theory) and decided that fun should preside over fanciful function. Smart people, aren't they?

Surround

■Atari 2600 ■Programmed by Alan Miller ■Published by Atari ■Action ■2 players ■Controller: Joystick

Arguably one of the greatest two-player games ever put to pixel, Surround is so elegant in its simplicity that one cannot help but to wax fantastical on the day where nations will settle their disputes not by famine-conducive embargoes or devastating armed conflicts, but by pixillated duels of wits and honor hosted by Atari, the proprietors of a good time. The gameplay of Surround will strike a chord with anybody who longed to be in the lightcycle battles in Tron. Each player controls a square, which can be controlled freely around a grid. Each square leaves a trail behind it, and the object of the game is to entrap your opponent in your wall of death. The game calls for some heavy strategizing and on-the-fly ingenuity, and with more than 12 modes that serve up gameplay variables, such as speed, the direction you can move, etc. Surround is a mind-bending time killer if there ever was one, and it includes an über-cool Video Graffiti mode.

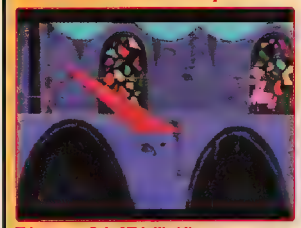
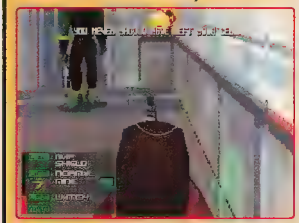
When 3D Goes Awry



This game...Out of This World!

Not every game should be converted into 3D. Sometimes, it's a bit of a mess. Back in the day, there were two side-scrolling science-fiction games called Out of This World and its sequel Flashback. Both were essentially weird extrapolations of what Jordan Mechner did with the first Prince of Persia and what would later be accomplished in the Oddworld games (like Abe's Odyssee not that Xbox Munch game). That is, lots of exquisitely timed platform hopping and some of the most fluid character animation the world had yet seen. Oh, and both were really freaking surreal.

That's why **Fade to Black** (PlayStation) was such a disappointment. It was the much-touted 3D sequel to Flashback, and when it arrived, it arrived with a thud. The previous games' elegance had been replaced by lots of squareish corridors and a control scheme that was too hard to operate. We'd love to see them take another stab at it after seeing how Ubisoft handled the latest Prince of Persia game, maybe in a sort of cel-shaded Killer 7 style.



This game...not so much.

When 3D Goes Awry

You are standing in an open field west of a white house with a boarded front door. There is a small mailbox here.

What's the ultimate 2D game? Text! Yes, the glory days of early 1980s computer-game technology gave birth to the text adventure, which created worlds with nothing more than words. White text on a black background? It doesn't get more 2D than that! (Hey, don't knock it—your cell phone could run these games, and it'd be more fun than Evil Dead Pinball.) When Myst hit, Activision revived the granddaddy of the genre, Zork, with a rich 3D-rendered world with some live actors thrown in to spice things up. The game was called **Zork: Grand Inquisitor** (PC), and it was rife with semi-silly spell-casting references and vaguely amusing words and situations that recalled the series' glory days as "interactive fiction." Unfortunately, the game looked better in 2D because the 2D version had the best graphics ever: *your own imagination*. Forcing the Great Underground Empire into 3D and adding *A-Team* actor Dirk Benedict to the proceedings didn't help Grand Inquisitor unseat Myst, which it was blatantly trying to copy, and it didn't help Zork's spotless legacy, which it was blatantly trying to cash in on. Worse, this was the *third* mediocre 3D version of Zork after Return to Zork and Zork Nemesis. The lesson is clear: Don't touch what can't be improved.

A Tale of Two Tetrises

If you own an NES, you've probably played Nintendo's Tetris cart—one player with pastel colors. But did you know there's another, lesser-known version of the game that came out first? Tengen, Atari's home division, put out a carbon copy of the arcade Tetris, including the original colors, soundtrack, and one thing Nintendo left out: a two-player, head-to-head mode. Frankly, it blows the Nintendo version out of the water.

But Tengen's version was pulled from store shelves as a result of a legal battle. Atari thought they had full home rights to the game, but Nintendo had negotiated console and handheld rights separately. Nintendo quickly had the Tengen version removed from the market and replaced by their own inferior but hugely successful cart. Check eBay, or, if you scour flea markets, you might be lucky enough to find a Tengen cart; look for the distinctive gold label and slanted cartridge casing. Happy hunting!

When 3D Goes Awry

Sooooo not Castlevania

It's not easy translating the Belmont's story into the world of 3D. **Castlevania** for the N64 was the first to try and was actually a decent 3D action game, but it never captured the "old Castlevania feeling." Instead of an awesome soundtrack, one of the trademarks of the series, you were treated to long periods of atmospheric silence. Yes, silence. The whip mechanic never really gelled, and the puzzles felt a bit out of place. A tweaked version (Castlevania: Legacy of Darkness) with other playable characters was later released to moderate reviews, and a Dreamcast 3D foray was unceremoniously canceled. Thankfully, the recent PS2 version finally got things going in the right direction. But still, it's not the same as it used to be.

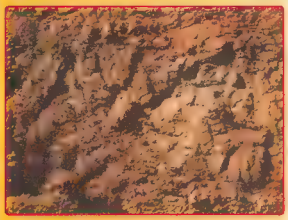
A Plea to Namco

Defender did it. Asteroids did it. Robotron did it. Pac-Man did it. Almost every arcade classic has done it. So, Namco, why haven't you done the obvious and put **Dig Dug** through the 2D-to-3D wringer? It's just as valid and excellent a game as any of those—and its recent appearance on almost every Namco Museum you can find means it hasn't been forgotten by today's gamers. The people have spoken, Namco! Give them what they want.



Here's an artist's conception of what a first-person Dig Dug game would be like.

Top Five Games Dan Elektro Is Playing Right Now

City of Heroes: shockingly good online RPG gameplay

1. **City of Heroes** (PC): I haven't gotten into MMOs since my beloved Motor City Online finally ran out of gas last August. But City of Heroes has me addicted to a persistent online universe all over again thanks to its smart party system, enjoyable missions, killer character creator, and fun superhero conventions. It's like NCsoft learned from every other online RPG's mistakes and avoided them all.
2. **Metal Slug 3** (Xbox): Metal Slug is one of the greatest 2D action games of all time—and yes, I've played Contra. The Slug series' finest chapter is arguably MS3, which has been preserved and enhanced for its Xbox debut complete with Xbox Live rankings. I even hooked up my X-Arcade joystick for that proper coin-op feel.
3. **Unreal Tournament 2004** (PC): I always had a soft spot for the hard action and copious gibs presented by the UT series, but 2003 left me cold. The '04 edition fixes everything and adds cool new stuff to the mix like vehicles and, crucially, voice-activated A.I. teammate orders.
4. **Super Puzzle Fighter II Turbo** (GBA): Tetris is still the greatest puzzle game ever created, but having this Capcom gem in handheld form is a treat. Miss Spell and I frequently battle head to head.
5. **Need for Speed Underground** (PS2): At first, I was turned off by the night-time-only racing and weird, slick, shiny roads—it looked really distracting to me. Then I got obsessed with finding just the right layering of vinyl and trying to unlock prettier paint schemes. Now I'm in it to win it, and I'm only getting better at the drift tracks. If I go online, though, I'm in for a beating.

Ten Things That Every Game Should Have (The Bottom Five)

No design document should make it past the first draft without these things in place. They're not hard—but they're the kind of touches that are invaluable to gamers everywhere.

10. **Practice modes**. You can learn a cool new move or master a play much more easily if you can just get a break from the bloodthirsty opponents and swarming defenders. This is especially good if you learn that move five seconds before the last boss battle.
9. **Create-a-player and instant replays in sports games**. Half the fun of sports gaming is putting yourself in the action against the pros. And half the glory is rubbing that killer play in your bud's face over and over again.
8. **Separate on/off functions for music, sound effects, announcers, etc**. Face it: Some people are going to hate the licensed soundtrack in a game, and some announcers are going to make some players go postal.
7. **In-game quit function**. Especially with the Xbox, which doesn't have a reset button for some damn reason. Nothing's worse than having to get up off the couch and press the power button. Seriously, *nothing*.
6. **Adjustable difficulty**. Some games are just too damn hard for novices, and they'll never get into the action if they get thrashed at every turn.

Ten Things That Every Game Should Have (The Top Five)

Continued from page 76.

5. **Jumping right into the game.** Being forced to sit through that gratuitous movie of the publisher's logo accompanied by melodramatic music for the millionth time is just crap.
4. **In-game help.** Manuals? Who reads manuals? Getting that key piece of info without leaving the game is always a bonus.
3. **Hidden costumes, characters, modes, and moves that enhance the game after the first playthrough.** Good examples: Onimusha's panda costume or the ridiculous stuff Heather can do in Silent Hill 3.
2. **Configurable controls.** It's amazing how many games still don't let you reconfigure your button scheme. It's fine to have a recommended default option, but let me make ○ my jump button!
1. **Skipping over cinemas.** Nothing's more annoying than dying for the 11th time and having to watch the same five-minute conversation for the 11th time. It was fine the first time, but please, make it stop, I just want to try to kill that damn boss.

Parallel Dimensions: Honorable Mentions

Sega's original ninja wasn't much like his PS2 counterpart.

The interesting thing about the 3D remakes of **Ninja Gaiden** (Xbox) and **Shinobi** (PS2) is that they didn't even try to pretend to be like their 2D predecessors—they simply used the name and the concepts of shurikens and ninja magic as stepping stones to new gameplay. Shinobi absolutely requires the player to fully understand the 3D space in order to succeed in pulling off the game's tricky combos and chains. Ninja Gaiden was basically a hyperpretty Onimusha with a jump button and *awesome* fight scenes. Some people hate these games' rather absurd level of difficulty (these people are called "posers"), but others admire them for channeling an old, nearly-forgotten 2D-era philosophy—that games should test one's skill, not one's ability to follow directions.

If this game didn't exist, perhaps jumping puzzles wouldn't either.

The first **Prince of Persia** (for PCs of the era, such as they were) all but defined the jumping puzzle with its stonework jungle gyms of impossible leaps, impeccably timed escapes, and precision landings. And spikes. But if Tomb Raider has taught us nothing, it's that intricate, take-five-minutes-to-get-the-angle-right jump puzzles are really quite crap in 3D. That's why Ubisoft's recent PS2/Xbox reinvention of Prince of Persia was so great—it gave you all the theatrics of death-defying 3D acrobatics with half the frustration. Oh, and that Dagger of Time, which let you retry instead of reload—brilliant.

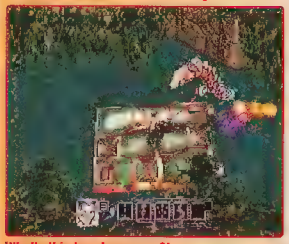
When 3D Goes Awry



What's this top-down crap?!

Konami's Contra series is a prime example of what happens when a good 2D side-scrolling shooter goes bad...by going 3D in **Contra: Legacy of War** for the PlayStation. How 3D was it? Why, they even had a 3D mode that involved real red-and-blue 3D glasses. Hey, what do you want, it was all the rage back then.

In this case, the dimensional shift resulted in poor game design (top-down Contra?!?!) and just plain zero fun. Where were the waves of bullets? Where were the crazy bosses with their nutty patterns? Going 3D almost struck a near-fatal blow to this gamers'-game franchise; not even the far superior Contra: Shattered Soldier (which, thankfully, pulled the gameplay back into the 2D plane) could quite repair the damage that was done.

Red Dead Revolver

You've reached the end of the line, and it's time for Red to settle his age-old score and bring peace to the Old West. By Major Mike

The End

Chapter 27: Fall from Grace

It's time for the final showdown with Governor Griffon. But before you can go toe-to-toe with the corrupt politician, you must get past his goons.

You fight through two waves of Griffon's henchmen. During the first wave, you must dodge sticks of dynamite that are thrown at you while Buffalo Soldier plants an explosive so you can get to the second half of the roof.

Be sure to lay down ample cover fire for Soldier.

After Soldier destroys the gate leading to the second half of the roof, use your rifle to take out Griffon's goons. Once they're all gone, nail the governor with head shots.

After taking several shots to his head, the governor challenges you to a duel—the most difficult duel in the game.

Griffon is fast on the draw, so target his head as many times and as fast as possible.

It may take a few tries, and each failed attempt puts you at the beginning of the chapter.

Once you beat Griffon, the game's over and Red can go on his way.

After the Battle

After the credits roll, save the data, and when you start a new game, you will have the Scorpion revolver—the most powerful handgun in the game—in your inventory.

Completing the game also unlocks Bounty mode, which can be accessed at the main menu. Bounty mode lets you revisit almost any chapter in the game, and each one has a new objective.

By successfully completing chapters in Bounty mode, you can unlock hidden characters and stages for multiplayer deathmatches. GV
